

delaoliva. enjoy your office

WHO ARE WE?

Since 1957 providing solutions in office, school and contract furniture and seating. A benchmark company as a manufacturer of office seating with a presence in relevant public and private organisations and entities at national level and with a clear international vocation.

In 2018 Mobboli was created, a brand of P. de la Oliva S.A., aimed at the contract channel, with a commitment to design and internationalisation. The result of delaoliva's creative initiative.

FACTORY

We are manufacturers. Our own production processes at all stages.

30.000m² of manufacturing facilities, metal and wood workshop, painting, upholstery, assembly...

PRODUCT

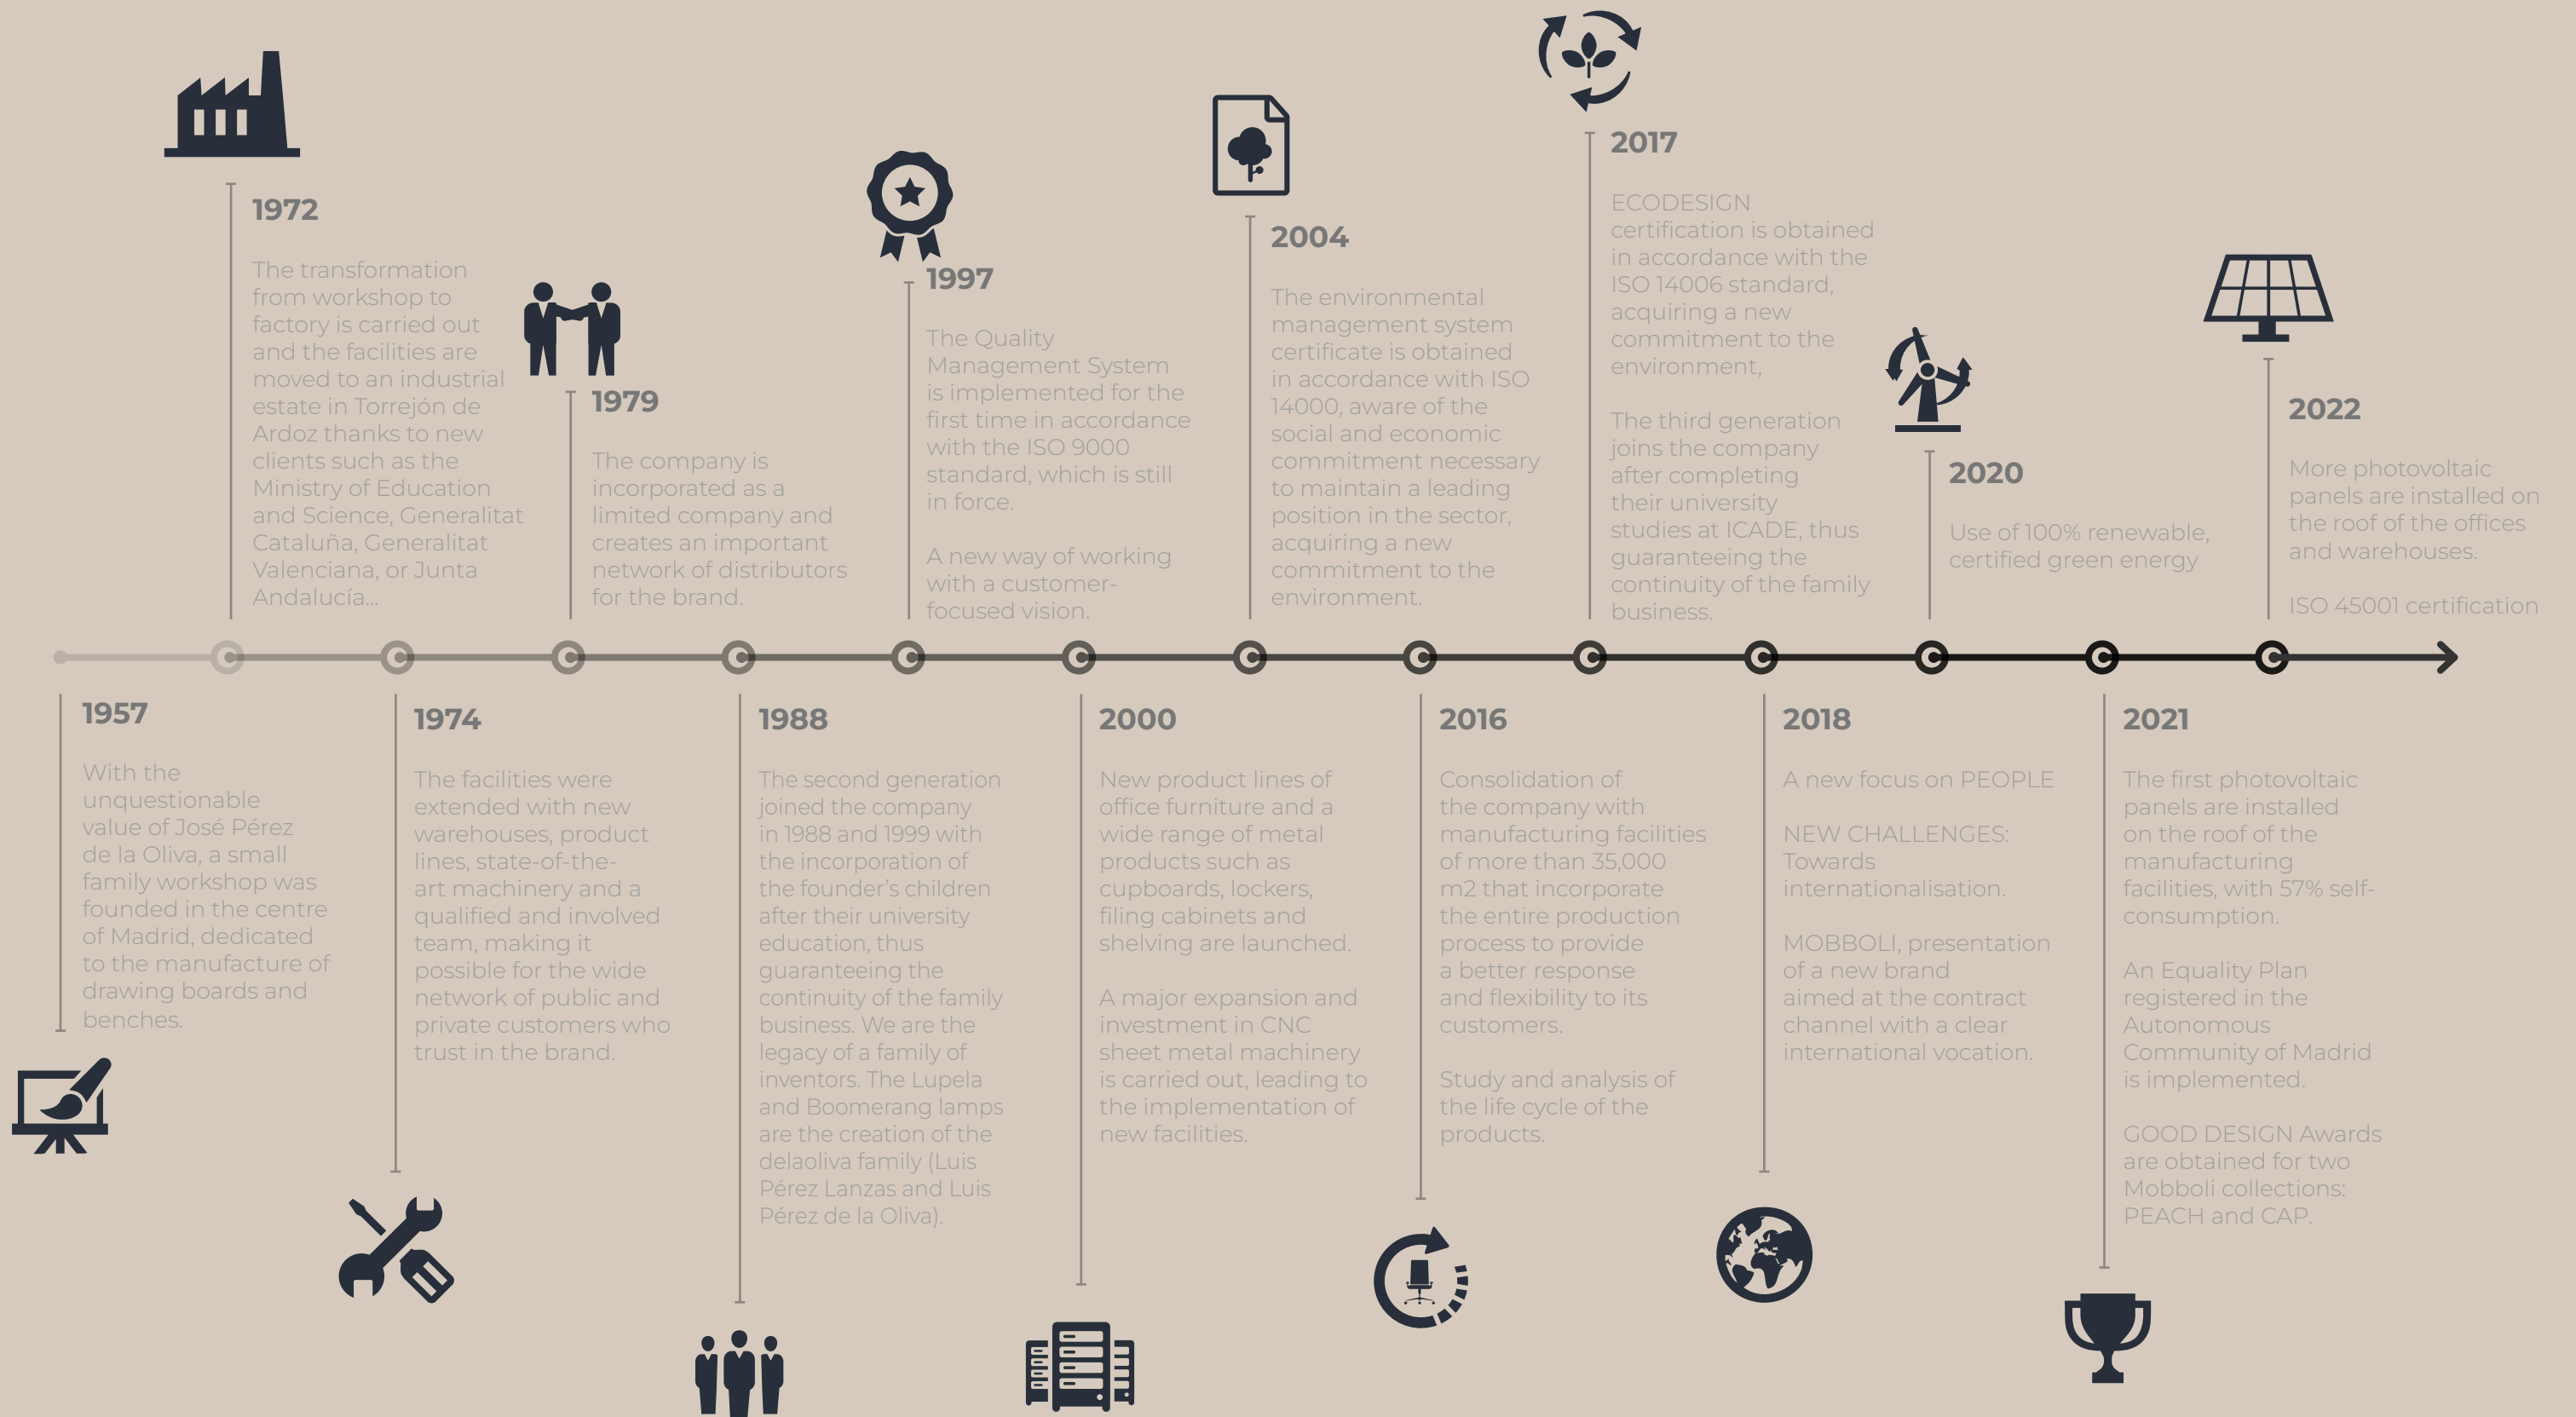

We care about people's wellbeing, designing and manufacturing sustainable, comfortable and durable PRODUCTS to create healthy working environments. Design, sustainability, ergonomics and quality define our products. Wide range of products with endless possibilities.

FLEXIBILITY

Flexibility with endless options and finishes. Production capacity.

Adaptation to customer needs. Flexible product offer. Thinking about people and satisfying customer needs.

HISTORY

MADE IN SPAIN PRODUCTION

Since 1957 we have been manufacturing in Spain, with facilities located in Madrid, which places us in the centre of the Peninsula, optimising distances to all parts of Spain. Madrid puts us in an excellent logistical location.

- Russia
- Portugal

DESIGN

PRESTIGIOUS PARTNERS

DESIGNERS

In-house industrial design team. R+D+i

Our passion: Designing with people in mind to meet their present needs and innovating to anticipate their future needs.

They are the ones who give physical form to the ideas that the whole team gathers from our environment, trying to cover the needs that our clients transmit to us and the challenges that the current panorama presents us with.

In collaboration with our highly qualified production team, we develop the prototypes that we all evaluate together to contribute ideas, always focusing on the opportunity for improvement.

“Good design has no expiry date”.
Harry Seidler

Ximo Roca

Valencian designer, member of the ADCV and member of BEDA. He studied at the Escuela Superior de Arte y de Diseño de Valencia. He has been awarded multiple prizes for his career and products, such as the Biel wastepaper basket.

Lievore – Altherr - Molina

Studio created in 1991 dedicated to product design, consultancy and art direction, renowned for its furniture designs. In 1999 it received the National Design Award for its excellent and exemplary career. His designs include the Manolete armchair and the Rothko armchair.

Héctor Diego

Industrial Technical Engineer from the CEU University of Valencia specialising in Product Development.

Valencian designer awarded Good Design by The Chicago Athenaeum, in the category of urban furniture with the Plane Series benches produced by delaoliva.

Gabriel Teixidó

Born in Barcelona, he trained at the Escuela de Artes Aplicadas y Oficios Artísticos de Barcelona, specialising in product design. He is currently one of the most renowned Spanish designers in the sector with more than 30 years of professional career focused on making people happy by creating a simple and functional product. He has countless design creations and important awards.

WE ECO-DESIGN OUR PRODUCTS

From the conception of their design, we assess the environmental impact of our products throughout their life cycle to reduce their environmental footprint at every stage.

“Commitment to the environment is ingrained in our mission and actions. It governs our behavior in all processes of our company.”

ENVIRONMENTAL COMMITMENT

1. We reduce the consumption of material resources.

We prioritise the use of recycled materials and use recyclable materials. We use wood from FSC controlled forests. We select environmentally responsible suppliers. We optimise resources and production processes to generate as little waste as possible and we contribute to the circular economy by incorporating part of this waste into the production process.

2. Design and manufacture of sustainable products.

Ecodesign (ISO 14006). Internalised in-house manufacturing in all its processes. Incorporation of “waste” in stages of the production process, contributing to the circular economy. Low energy consumption machinery. Use of green and renewable energy (photovoltaic panels). Waste management. **Manufacture of the product under the premise of durability.**

3. Efficient transport.

Own low polluting trucks.
We reduce/reuse packaging.

Optimisation of organised routes for mainland Spain.

Optimisation of volumes for exports and agency shipments.

4. We extend the useful life of our products (maintenance and after-sales service).

Quality and durability of the product. Minimum warranty of 3 years. Maintenance and after-sales service that ensures the availability of spare parts for at least 10 years. Shared spare parts for various models, which facilitates the reuse of components and guarantees that the life of delaoliva products can be extended.

5. We facilitate the recycling of our products.

At the end of the product’s useful life. We design and manufacture by carefully choosing materials and components that are easily identifiable and recyclable, allowing the separation of components for proper recycling or reuse, contributing to the circular economy. Commitment to end-user information and training.

CERTIFICATES

ISO 9001 Quality Management System - ISO 14001 Environmental Management System - ISO 14006 Eco-design - Wood from sustainably managed forests FSC - INNOVATIVE SME - Certified Equality Plan - Quality controlled by ANIEME: Product certificate - 100% green energy certificate.
